Introduction

BackEnd Developer with over 6 years of experience designing and deploying scalable and maintainable software systems. Proven expertise in C#, .NET Core, and EF Core, with a track record of improving system performance by up to 30% through database optimization and caching strategies. Skilled in implementing microservices, RESTful APIs, and serverless solutions using AWS Lambda, leveraging design patterns like CQRS and Onion Architecture for robust system design. Adept at containerized deployments using Docker and version control with Git. Passionate about solving complex technical challenges and delivering high quality software in collaborative environments.

Skills

- | | | |
|----------------------|----------------|-------------------|
| ● C# | ● RESTful APIs | ● Design Patterns |
| ● .NET | ● DDD | ● Unit Testing |
| ● EF Core | ● CQRS | ● Docker |
| ● Dapper ORM | ● Microservice | ● Redis |
| ● TransactSQL (TSQL) | ● RabbitMQ | ● Git |
-

Experience

Senior Back End Developer • Hese Tazegi

Remote, Tehran; November 2025 – Present

- Designed and developed scalable backend services using .NET Core following Domain-Driven Design (DDD) principles.
- Implemented efficient data access using Dapper and optimized complex SQL queries.
- Improved Elasticsearch search performance by about 50% through query optimization and index tuning.
- Integrated Redis caching to improve response time and reduce database load.
- Developed and maintained RESTful APIs for internal services.
- Collaborated using GitLab for version control and CI/CD workflows.

Technologies

C#, .NET Core, Dapper ORM, Elasticsearch, Redis, Domain-Driven Design (DDD), RESTful API, TSQL, Git

Senior Back End Developer • Mores Software

Remote, Tehran; September 2024 – August 2025

- Designed and implemented highperformance, scalable backend systems using .NET Core and Dapper ORM.
- Applied CQRS patterns to optimize database interactions.
- Integrated AWS Lambda for serverless logic and Amazon S3 for storage.
- Practiced TDD and used Docker for containerized deployment.
- Developed efficient REST APIs and optimized queries with TSQL.
- Collaborated in crossfunctional teams with Git for version control.

Technologies

C#, .NET Core, Dapper ORM, TSQL, CQRS, RESTful API, Docker, AWS Lambda, Amazon S3, Git, TestDriven Development

Back End Developer • Chargoon

Remote, Tehran; January 2022 – January 2024

- Migrated legacy systems to scalable microservices on the Zagros platform.
- Built APIs using ASP.NET Core, EF Core, and Dapper.
- Enhanced SQL Server performance through indexing and Redis caching.
- Ensured reliable integration with frontend via RESTful APIs.
- Used Docker for deployment across dev, test, and prod environments.
- Followed Agile practices and used Git for collaboration.

Technologies

ASP.NET Core Web API, EF Core, Dapper ORM, SQL Server (Stored Procedures), Redis, Docker, RESTful API, Git

Back End Developer • Simorgh Human Resources Systems

OnSite, Qom; April 2018 – February 2021

- Built APIs and ASP.NET MVC applications for HR process automation.
- Optimized stored procedures and indexing in SQL Server.
- Designed RESTful services for seamless integration.
- Participated in requirement analysis and implementation.

Technologies

ASP.NET MVC, Entity Framework, SQL Server (Stored Procedures, Indexing), RESTful API, Git

Software Developer • Mohaymen ICT Group

OnSite, Qom; January 2017 – June 2018

- Developed Windows Forms Applications and backend logic in C#.
- Used LINQ for data operations and optimized stored procedures.
- Contributed to design and development of business solutions.

Technologies

C#, .NET Framework, Windows Forms Applications, LINQ, SQL Server, TFS

Education

Bachelor's Degree, Computer Software Technology Engineering

Technical and Vocational University | 2016 – 2020

Honors & Awards

Silver medal at 19th's Iran National Skills

World Skills Competition | Issued by Iran TVTO | October 2021
